

PROFILE

Founder and operator-builder translating finance and operations problems into tested digital workflows. Strongest in requirements, process mapping, product ownership, quality checks and practical automation.

CORE STRENGTHS

- Product and workflow ownership
- Requirements and process mapping
- ERP and finance-domain analysis
- Testing and acceptance criteria
- Automation and document workflows
- Stakeholder coordination

SYSTEMS

Web applications, accounting / ERP prototypes, Horizon, SAP, Hansa, GitHub, Excel / Sheets and AI-assisted workflow tools.

LANGUAGES

Latvian - native
English - advanced professional; degree completed in English
Russian - fluent
French - academic foundation
Mandarin Chinese - beginner

EDUCATION

University of Latvia | 2022-2026

Bachelor of Social Sciences in Economics - International Economics and Commercial Diplomacy (English-taught)

Admitted to the Master's programme in European Studies and Economic Diplomacy; matriculation pending.

EXPERIENCE

Founder & CEO

ALIREX SIA | Jan 2023 - present

- Own product requirements, workflow logic, testing and UX decisions for Alirex.app and the ObsidianBK finance platform in development.
- Designed integrated flows for accounting, documents, banking, purchasing, inventory, payroll data and auditability.

Accounting & Systems Process Support

CBB Consultancy Bureau | Sep 2024 - Jul 2026

- Worked across finance-system routines, data checks, reconciliations and reporting, building direct understanding of user and control needs.
- Converted exceptions between documents, people and systems into structured follow-up and clearer operating steps.

Commercial Operations Support

5Metri.lv | 2016 - present (periodic)

- Coordinated real order, procurement and supplier / client workflows that later informed software process design.

SELECTED EVIDENCE

- Built and recovered a portfolio of finance, operations and software prototypes with truthful live / case-study status labels.
- Open-source Solana token-risk contribution: ZeroClaw PR #93 is open, not merged; current branch includes 18 host tests.
